

Aspic 160 Table

Design Gordon Guillaumier

Technical Information

Following the success of the ASPIC coffee tables designed by Gordon Guillaumier, the collection evolves with a dining version featuring new colors that maintain its sculptural character and refined finish with exposed aggregate. In this larger dimension, the strong materiality and architectural simplicity of the series are highlighted, characterized by a solid concrete structure, sinuous lines, and the elegance of the dotted top. The three new distinctive shades - Orange, Green, and Mole - proposed for the dining table are inspired by natural tones that give the piece a unique character, allowing it to harmoniously blend into the surrounding environment. The concrete used in ASPIC 160 has a superior performance compared to that used for the other components of the collection, ensuring durability even in large sizes with reduced thickness and significant overhangs

TECHNICAL INFORMATION

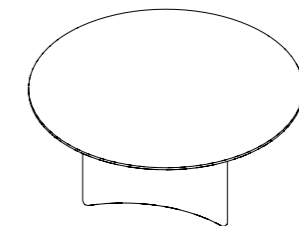

DESCRIPTION
Table for outdoor use.

STRUCTURE
Concrete

WEIGHT
Structure 198 kg

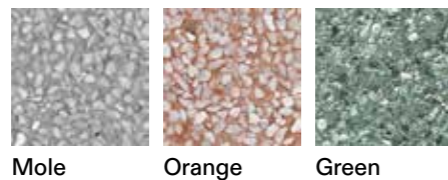

STORAGE COVER
Available.

DIMENSION
Ø 160 × H 75 cm
Ø 63" × H 29" ½

Materials

CONCRETE

Mole

Orange

Green
