

Nidia 202 Shelving

Design Dordoni Studio

Technical Information

NIDIA, designed by Dordoni Studio, reinterprets shelving as a flexible element, capable of evolving into articulated compositions or taking on its most essential form. The stainless steel structure accommodates optional storage elements in aluminium and natural teak, introducing compact volumes and customisable configurations. The shelves, available with gres or wavy glass tops, create a refined dialogue between material, colour and transparency. Available in different heights and widths, NIDIA adapts to different spatial configurations, creating ever-changing compositions.

TECHNICAL INFORMATION

DESCRIPTION
Shelving for outdoor use

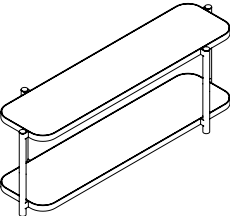

STRUCTURE
Powder coated stainless steel

TOP
Gres or wavy glass

WEIGHT
Structure + gres top 42 kg
Structure + wavy glass top 53 kg
