

# Norma 001 Cooking Module

Design Rodolfo Dordoni

Technical Information

NORMA is the new outdoor kitchen designed by Rodolfo Dordoni. An innovative product for RODA, a new revealing experience in the world of cooking. The collection includes a module with a sink, one with a hob and one with a barbecue, available with fixed feet or castors. To these three modules, an island can be added that attaches to the sink module to provide an extension of the work space or a dining area where one can sit like at a counter. On request, the space below can include a fridge. The collection is further enhanced with optional stainless-steel griddles, larch wood chopping boards, and a custom-fit protective cover for the hob and barbecue, designed to fit perfectly into the space under the island.
