

Pier 025 Table

Design Rodolfo Dordoni

Technical Information

PIER is a teak garden table, as essential as fascinating. Its wooden slats, slightly distanced like the keys of a piano, make us imagine an infinite continuous surface running in the outside landscape. Then, suddenly, the same slats veer vertically and become legs. Easy to combine with different types of outdoor chairs, PIER is the outdoor table, a timeless icon, the undisputed protagonist of open air lunches, both in the rectangular and in the square versions, but it matches even the most refined indoor setting with great elegance.
