

Platter 314 Table

Design Rodolfo Dordoni

Technical Information

The PLATTER garden table is a piece of furniture designed with extremely durable materials, easy to place inside and outside the house, thanks to a strong but sober personality. The lacquered metal pedestal seems to plunge into the ground. A slender stone top works like a thin diaphragm between heaven and earth: this is PLATTER, a design table able to furnish an outdoor or indoor space where you can enjoy some relaxing moments in the company of a pleasant book or a good glass of wine.
