

Trace 002 Rug

Design Roda Studio

Technical Information

A graphic gesture defines the space and subtly shapes its perception. TRACE is an outdoor rug that interprets the surface as a design element, introducing a delicate, contemporary rhythm into the setting. Its essential pattern, enriched by a nuanced texture, creates a harmonious relationship with the surrounding furniture and architecture. Designed for outdoor living TRACE combines durability and comfort, transforming the surface into a more welcoming and intimate environment. Its presence is understated, yet capable of defining and organising different areas without interrupting the visual continuity of the space.

TECHNICAL INFORMATION
